

Brought to you by

Sharing care is easier when you do it *jointly*

Our app helps keep everyone in the loop

Features

Home: Invite people, see who is in your circle, view a log of recent activity.

Profile: Store useful information about the person you're looking after and access it at the touch of a button.

Messaging: Communicate with everyone in your *Jointly* circle at a touch of a button. Simply post a message or upload an image.

Tasks: Stay on top of everything with tasks and lists. Add tasks and assign them to any member of your circle (including yourself) and monitor their status.

Calendar / Appointments: Create appointments and events and invite anyone in your calendar.

Medication Manager: Keep track of current and past medication for the person you're caring for. Upload images to identify medicines quickly.

Notes: Create and organise notes and store images, sort them into categories or just view as a simple list.

Contacts: Store useful contacts and access their details any time, anywhere!

Settings: Manage the settings of both your personal account and the *Jointly* circle as a whole.

What is Jointly?

Developed by Carers UK, *Jointly* is a mobile and online app that can make life better for the millions of people looking after a loved one.

Designed in consultation with carers, *Jointly* brings together key features in a single tool.

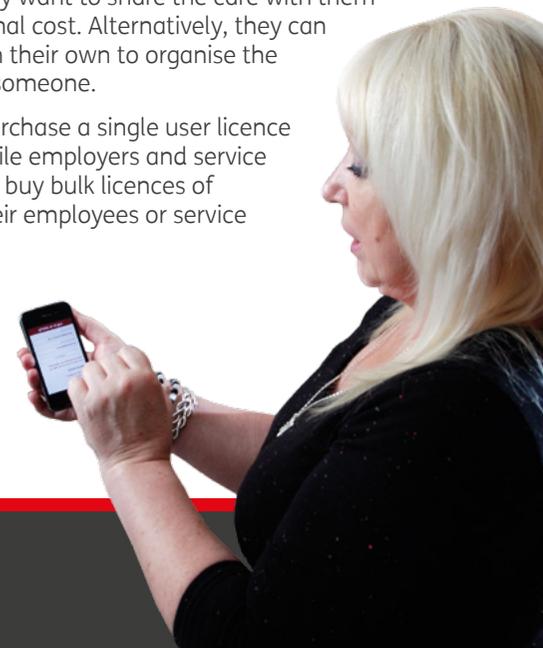

- One central place to store and share the important information about the person you are looking after.
- Simple, intuitive group communication to keep everyone informed and better connected.
- Shared calendar, task lists and medication manager to help co-ordinate responsibilities and organise what needs to be done.
- Works across different devices: smartphone, tablet or home computer / laptop.

How it works

Jointly works by enabling people to set up circles of care.

Once a user sets up a *Jointly* circle they can invite as many people as they want to share the care with them at no additional cost. Alternatively, they can use *Jointly* on their own to organise the care around someone.

Carers can purchase a single user licence of *Jointly*, while employers and service providers can buy bulk licences of *Jointly* for their employees or service users.

jointly for carers

Looking after someone?

Jointly makes sharing care with others easier, less stressful and more organised.

It costs just £2.99 to set up a Jointly circle.

Adding others to your Jointly circle is free.

Once you've got your account you can log in to the app on your mobile, tablet, laptop or desktop computer.

- iPhone (iOS versions 6.0 and above)
- iPad (iOS 6.0 and above)
- Android devices (versions 4.0 and above)
- Most modern web browsers

For more information about Jointly, including a video, FAQs and user manual, just visit jointlyapp.com

Not sure if Jointly is for you? Download the app today and set up a demo circle for free.

“

Looking after someone can be complicated. Jointly helps me stay on top of things and share information easily with everyone involved in the care of my son.

”

jointly for employers

Forward thinking employer?

Forward thinking employers are offering Jointly as an employee benefit to members of staff who are caring for a loved one.

Why is this important?

1 in 9 people in your workforce is caring for someone who is ill, frail or has a disability. The majority will be between 45-64, the peak age for caring, when many employees will have gained valuable skills and experience.

With fewer young people entering the job market there has never been a more important time to focus on the benefits of retaining skilled workers rather than incurring the costs of recruiting and retraining new staff.

“We were delighted to offer the Jointly app to our colleagues. Jointly is an innovative new service that supports carers to manage care for a loved one, which is very helpful for carers who balance their caring responsibilities with work.”

Sainsbury's

jointly for services

Service provider?

Service providers (such as local authorities, carers centres, housing associations, GPs, etc.) are offering Jointly as a low cost solution to service users with caring responsibilities.

As a service provider you may also want to offer Jointly to members of your staff who are looking after a loved one.

Why is this important?

A new policy landscape means that there are real changes in the way that professionals and organisations will need to support carers. Jointly is a low cost solution that can help you deliver this change, reaching families and carers with a tool that makes sense to their every day lives.

“Jointly is an innovative product we can offer carers in order to support them in their caring role. It is especially useful for those who are juggling work with care and those carers who are sharing the care with other family members, friends or neighbours.”

Jointly for employers and service providers

Employers or service providers can purchase bulk licences of Jointly. We will provide you with all you need to allow your employees or users access the app.

For more information about how to purchase bulk licences please contact jointlyapplicences@carersuk.org

What you get:

- A unique Jointly code: gives your employees or service users access Jointly for free
- Jointly leaflet: offers useful information on Jointly for perspective users
- Jointly poster: to help you promote Jointly within your organisation or area
- Jointly toolkit: to help you roll out Jointly.
